

# **Panorama™ NovaView® 6.0.3**

*Planned Fix PN6402617 – Release Notes*

## About the Planned Fix PN6402617 Release Notes

This Planned Fix applies to the Panorama™ NovaView® products

The information is detailed in the following sections:

- [Resolved Issues](#)
- [Enhancements](#)

## Resolved Issues

This section discusses resolved issues pertaining to the following Panorama™ NovaView® products:

- [Panorama™ NovaView® Server](#)
- [Panorama™ NovaView® Web Access](#)
- [Panorama™ NovaView® Flash Analytics](#)
- [Panorama™ NovaView® Dashboard](#)
- [Panorama™ NovaView® Office Client](#)

## **Panorama™ NovaView® Server**

The following are resolved issues related to the Panorama™ NovaView® Server:

- **CR 21904/ Issue 8192-3096** - Views migrations can be applied on book with non English name.
- **CR 20941/ Issue 2341** - [H] Slicer security string is applied on AS 2005 and 2008 cubes when the hidden dim is inside the crosstab.
- **CR 22801** – Panorama APIs can be used with cross domain when using latest SUN VM.
- **CR 22943/ Issue 2598** – The option to 'Run Web Access' as Administrator from the Panorama NovaView Server is now available when using Impersonate-Users mode.
- **CR 23020/ Issue 2627** - Drill To Level will not add parents explicitly to MDX When the registry key UseAdvDimStruct is in used

## **Panorama™ NovaView® Web Access**

The following are resolved issues related to the Panorama™ NovaView® Web Access:

- **CR 20883/ Issue 8192-2986** – "Medium" captions can be translated using decode file
- **CR 22855/ Issue 3018** - In-between chart value set to round values.
- **CR 22911/ Issue 8192-3240** - Edited minimum and maximum values for second axis chart are being saved correctly.
- **CR 21984/ Issue 2473** - Performance improvements when importing attributes from the Select dimension dialog directly to the crosstab.
- **CR 21155/ Issue 2399** - In Smart Reporting mode, space between titles and report content is eliminating when using Freeze X Axis.
- **CR 18128/ Issue 1846, 2413** – In Sun Java, when switching between the Analytics and the Smart Reporting modes, the Reporting mode will fully cover the applet frame.
- **CR 20133/ Issue 8192-2887** - In Smart Reporting mode, "Same width to all data cells" option will be applied also to new added data columns.

## **Panorama™ NovaView® Flash Analytics**

The following are resolved issues related to the Panorama™ NovaView® Flash Analytics:

- **CR 22692/ Issue 2552** - The default page in the book will not display a graph unless it was predefined in the view.

## Panorama™ NovaView® Dashboard

The following are resolved issues related to the Panorama™ NovaView® Dashboard:

- **CR 22324/ Issue 2593** - Printer friendly version renders Panorama NovaView components for Classic Analytic (Java) pages in Dashboard Ajax mode.

	<b>Note</b>
	Currently Printer Friendly version doesn't print Advanced Chart types in Dashboard Ajax mode.

- **CR 22628/ Issue 2622** – 'Options' button is now available for non-admin users in Dashboard Windows authentication mode.
- **CR 22813/ Issue 2624** - Dashboard impersonation is available before the impersonated user was logged in once to the Dashboard as a user.
- **CR 22996/ Issue 2623** – Dashboard Administrator can impersonate to "Content Editor" or "Section Manager" user.
- **CRs 22694, 23014/ Issue 2626** – New mechanism improves Flash Chart resizing for small chart components.
- **CR 22661/ Issue 2573** – All Tree-Map settings are now reflected in the Dashboard preview page: Color definitions, 'Show Legend' and 'Show chart selected rows only'.
- **CR 22287/ Issue 2339** – Slicers appears correctly when selected to show in separate horizontal component.
- **CR 22856/ Issue 3224** - MS JVM available in Ajax mode.

## Panorama™ NovaView® Office Client

The following are resolved issues related to the Panorama™ NovaView® Office Client:

- **CR 22237/ Issue 2411** - Excel Add-In is now available for Sun Java version 6.10 and above on windows 2008 and Windows 7 OS.

	<b>Note</b>
	<p>The default for Panorama NovaView Office client is now Sun Java.</p> <p>To change the client type add the registry key "ClientModelType" to HKEY_LOCAL_MACHINE\Software\Panorama\Novaview 6.X\ClientClient in each user client using the excel.</p> <p>The values types are:</p> <p>0 for flash</p> <p>1 for SUN JVM</p> <p>2 for MS JVM</p> <p>3 for J#</p>

- **CR 21906/ Issue 8192-3049** – Translations using decode file can now be applied in Excel client when using the 'Export to Excel' option.

	<b>Note</b>
	To activate this ability, need to add this registry key HKEY_LOCAL_MACHINE\Software\Panorama\Admin\ <b><i>ReplaceExcelByDecod</i></b> With a value of 1 to Panorama NovaView Server machine

- **CR 22887/ Issue 2585** – After Export View to Excel, the title Comment box contain the view information.

	<b>Note</b>
	To install Planned Fix PN6402617 for Panorama™ NovaView® For Microsoft Office, apply the following for each client machine: <ol style="list-style-type: none"><li>1. Close all Microsoft Office applications.</li><li>2. In case of upgrade: Uninstall 'NovaViewForOffice' application using the Add Remove Programs.</li><li>3. Install the new Panorama™ NovaView® Office Add-In, located on Panorama NovaView Server machine under: &lt;ROOT&gt;\Panorama\E-BI\ OfficeClient\ NovaViewForOffice.msi</li></ol>

## Enhancements

This section discusses enhancements pertaining to Panorama™ NovaView® products:

- **CR 22297/ Issue 2600** – New ability in Flash Analytic client, to cancel long lasting operation.
- **The following APIs are now available in Panorama™ NovaView® Flash Analytics:**
  - CallUpdateParameters
  - CallUpdateParametersEx

	<p><b>Note</b></p> <p>To Expose Parameters for NovaView Flash component embedded in HTML pages, need to add the following to the BeginNovaView code:</p> <pre>BeginNovaView(...);     AttachParameter("Alias", "...");     AttachParameter("Show", "Slicers;...");     <b>AttachParameter("Components", "SLICER_BUTTON,PARAMETERS_BUTTON");</b> EndNovaView();</pre>
---	--

- GetHierarchiesAsXML
- GetBranchAsXML
- CallSave(...)  
The following options are now available for Flash Analytic: Save to Excel, Send to email, Save to PDF.
- GetViewPath() – This API available only for Public views.
- CallShowView(view,fromCache)  
This API Supports the following formats for the parameter 'view':  
For relative path: `"/Folder_Name/View_Name"`  
For absolute path: `"/Views/public/Book_Name/Folder_Name/View_Name"`  
Note: "/" can be replaced with "\"
