

Panorama™ NovaView® 6.2.4

Planned Fix PN6406822 – Release Notes

About the Planned Fix PN6406822 Release Notes

This Planned Fix applies to the Panorama™ NovaView® products

The information is detailed in the following sections:

- [Resolved Issues](#)
- [Enhancements](#)

Resolved Issues

This section discusses resolved issues pertaining to the following Panorama™ NovaView® products:

- [Panorama™ NovaView® Server](#)
- [Panorama™ NovaView® WebAccess](#)
- [Panorama™ NovaView® Flash Analytics](#)
- [Panorama™ NovaView® Dashboard](#)

Enhancements

This section discusses resolved enhancements to the following Panorama™ NovaView® products:

- [Panorama™ NovaView® WebAccess](#)
- [Panorama™ NovaView® Flash Analytics](#)
- [Panorama™ NovaView® Universal Data Connector](#)

Panorama™ NovaView® Server

The following are resolved issues related to the Panorama™ NovaView® Server:

- **CR 26440** – New API: GetQuery() which will return the Direct-MDX query which is sent to the OLAP server so that it may be manipulated by an external application.
- **CR 24760** – Drillthrough actions will now work when members are moved in to the slicer bar, and the slicers are sliced on that member.

	<p>Note:</p> <p>The new mode is not enabled by default. To enable this please add the following registry key:</p> <pre>HKEY_LOCAL_MACHINE\Software\Panorama\NovaView 6.2\UseOldActionCoords=1</pre>
---	--

Panorama™ NovaView® WebAccess

The following are resolved issues related to the Panorama™ NovaView® WebAccess:

- **CR 24111 / Issue 2945** – Export to PDF shows correct data when the view has default member defined, and "always loads view with dimension's default member" is selected on the dimension.
- **CR 26524 / Issue 3181** – Resizing columns can sometimes result in the duplication of commas. That problem is also solved for export to PDF.
- **CR 24907 / Issue 3133** – The formulas type YTD/QTDT/MTD will now work.
- **CR 25448 / Issue 3158** – Set Display folders as children of measure group folders correctly, so that the Measure group hierarchies are correctly shown.

Panorama™ NovaView® Flash Analytics

The following are resolved issues related to the Panorama™ NovaView® Flash Analytics:

- **CR 24524** – More properties are available in the Properties pane.
- **CR 24925** – Hebrew translation added to the setup.
- **CR 25192 / Issue 3148** – API getAxisYName works in the Flash Client.
- **CRs 24394, 24609 / Issues 3010,3087** – Hebrew in Flash client is more suitable to Hebrew data.
- **CR 24337 / Issue 3017** – KPI crosstab works with a lot of rows without any deviation.
- **CR 26544 / Issue 3193** – Hebrew language, solved flash problem that shows incorrect characters (") in XML in [pnJ] section (boxa information).
- **CR 24875 / Issue 3130** – When drill down or up on members at crosstab, the scroll bar does not move to the left/up automatically instead staying at the point of the drill up/down.
- **CR 26621 / Issue 3175** – KPI. When choosing not to show goal\value\max or min in KPI it reflects correctly in the flash client.
- **CR 26627 / Issue 3171** – Flash - Drill down. The option "allow drill down" in Desktop no longer causes problems while trying to drilling down on members in Flash.

Panorama™ NovaView® Dashboard

The following are resolved issues related to the Panorama™ NovaView® Dashboard:

- **CR 26449 / Issue 3186** – Slicers in Ajax mode. Slicing kept now when moving between views.
- **CR 23728 / Issue 2773** – Dashboard can work with more than 32767 pages.
- **CR 26533 / Issue 3185** – Solving problem with toolbar option for changing the chart or grid, will now show at all times when required to do so.
- **CR 24614 / Issue 8192-3288** – Slicer Security on Hebrew Dimensions / Members does not work in Security plug-in mode.

Enhancements

This section discusses enhancements pertaining to Panorama™ NovaView® products:

Panorama™ NovaView® Web Access

The following are resolved issues related to the Panorama™ NovaView® Web Access:

- **CR 24298 / Issue 2982** – Cut and Paste from an external source to Web client in order to help with Advanced finds.

	Note: By selecting multiple cells (values) in Excel you can cut and paste them in to the NovaView Web client, they will then automatically comma separate so that the find will retrieve the multiple values.
---	---

Panorama™ NovaView® Flash Analytics

The following are resolved issues related to the Panorama™ NovaView® Flash Analytics:

- **CR 25947** – We have added the ability to ‘Copy grid to clipboard’
- **CR 24200 / Issue 2974** – The option to select more than 35 rows to show in chart using mouse drag has been made available in flash.

	Note: To add this functionality you must add the following flag to the file ...Program Files\Panorama\E-BI\FIash\config\common.txt i392=1 If the file fcommon.txt does not exist please create it as an empty text file.
---	--

Panorama™ NovaView® Universal Data Connector

- **CR 24194 / Issue 2970** – You may create a Private Model from which you may create Public views, this is a change to the security model settings.
